Press Release

First Colo GmbH expands DE-CIX connection

Munich, 27.06.2008 - Exactly one month ago, the First Colo GmbH operates on the Commercial Internet Exchange DE-CIX with a 1 Gbit connection.

Because of the strong response and good pricing conditions the First Colo GmbH embellishes their connection after a few weeks. More than 10 GBit are available for our customers via DE-CIX.

Thanks to new infrastructure within the datacenter the 10 GBit can now be fully exploited. New Fiber Switches provide enormous power reserves for the future.

Attractive prices guarantee competitive conditions for small and medium-sized businesses. Verges Martin, CEO, says: "Due to the high resonance, we can increase the bandwidth tremendously after such a short time already, since we are a DE-CIX member. Especially for huge projects and enterprises the expansion is worth it. Individual desires and projects can now be better implemented. Moreover customers who run Filehosting and Game Server Hosting benefit tremendously."

About the First Colo GmbH

The First Colo GmbH is for more than five years on the market. Back in 2002 First Colo arose from the servernetworks GmbH; in the course of our development a huge client base regarding hosting and housing emerged in a timely manner. In 2005 the change of the company's legal status to digitallabs network GmbH proceeded. Having undergone this process, you offered game server, hosting and housing products with great success. At the end of 2007, after more than two years of thriving market presence, three company members promoted the First Colo GmbH with the aim to reposition oneself on the market. Since the year 2008, the company has own localities in Frankfurt's data center for the purpose of renting Colocation Space. In 2009, a new backbone router, the Juniper MX480, was purchased and installed.
