Press Release

LambdaNet activation takes place

Munich, 21.01.2008 - The First Colo GmbH, headquartered in Munich, switches another connection to the second carrier, LambdaNet, today. The technical provision has already been made and in the course of the day the First Colo GmbH increased their connection to another GBit.

The company, which has been operational since 01.01.2008 as a Ltd., makes an important step to advance continuously in the future. By improving the connection, high performance, a modern computer center and enough space for projects can be offered to our customers.

Mid to late May, the First Colo GmbH is planning about a membership in the DE-CIX, the largest German Internet node. The company for 2008 is clearly geared towards growth and will be interesting for customers as attractive offers are made available.

About the First Colo GmbH

The First Colo GmbH is for more than five years on the market. Back in 2002 First Colo arose from the servernetworks GmbH; in the course of our development a huge client base regarding hosting and housing emerged in a timely manner. In 2005 the change of the company's legal status to digitallabs network GmbH proceeded. Having undergone this process, you offered game server, hosting and housing products with great success. At the end of 2007, after more than two years of thriving market presence, three company members promoted the First Colo GmbH with the aim to reposition oneself on the market. Since the year 2008, the company has own localities in Frankfurt's data center for the purpose of renting Colocation Space. In 2009, a new backbone router, the Juniper MX480, was purchased and installed.
